# 贝贝康艺术涂料 / Art paint

Eco-friendly paint

## 产品综述 / Overview

艺术涂料Eggshell是一种耐用、耐洗、耐磨损的环保涂料, 它拥有双层蛋壳结构, 弹性柔光工艺。鸡蛋壳般的光泽和质感纹理效果, 遮盖力优异, 专业品质。

值得一提的是, 使用它, 能让墙面更加额外的明亮和鲜艳色彩。贝贝康认为, 这种近似蛋壳般的触感, 可以被应用在家居中的大部分区域。

Eggshell is a durable, washable and wear-resistant eco-friendly coating with a double-layer eggshell structure and an elastic soft-gloss process. Eggshell gloss, eggshell-like luster and textured texture effect, excellent coverage and professional quality.

It is worth mentioning that using it gives the walls more extra bright and vibrant colors. vanlei believes that this almost eggshell-like touch can be applied to most areas in the home.

## 参考用量 / Reference dosage

深浅色基料耗材一致 / Consistent supplies for dark and light base materials

4-5m<sup>2</sup>/kg

实际覆盖范围将取决于表面的吸收能力和应用方法。

The actual coverage will depend on the absorption capacity of the surface and the application method.

## 光泽区间参数表 / Gloss interval parameter table

对于漆膜的光泽度来说, 并没有统一的评价标准。不同角度下测得反射光强是不同的, 一般用60°叫来测量, 使用60°光泽度计测量结果可以通过以下方法来进行分级:

There is no uniform evaluation standard for the gloss level of a paint film. The intensity of reflected light measured at different angles is different and is generally measured with a 60° call. The results of measurements with a 60° gloss meter can be graded by :

参数 / Parameters	等级 / Level
>70%	高光泽/ High gloss
30% ~ 70%	半光泽或中光泽 / Semi-gloss or medium gloss
2% ~ 30%	蛋壳光 / Eggshell light
2% ~ 6%	蛋壳光—平光 / Eggshell gloss
< 2%	平光 / Flat

⚠ 注意, 这里的光泽百分数, 并非反射率, 而是一个相对值。

It should be noted that the luster percentage here is not a reflection rate, but a relative value.
